There are two exceptions: you do not need to give rate information concerning (1) services furnished at cost or (2) services or facilities furnished to nonsubscribers. Rate information should include both the amount of the charge and the unit in which it is usually billed. If any rates are charged on a variable per-program basis, enter only the letters "PP" in the rate column. Block 1: Give the standard rate charged by the cable system for each of the applicable services listed. Block 2: List any services that your cable system furnished or offered during the accounting period that were not listed in block 1 and for which a separate charge was made or established. List these other services in the form of a brief (two- or three-word) description and include the rate for each.

How to Identify a Subscriber Group for Partially Distant Stations Step 1: For each community served, determine the local service area of each wholly distant and each partially distant statio	n you Stations
carried to that community.	
Step 2: For each wholly distant and each partially distant station you carried, determine which of your subscribers were loca outside the station's local service area. A subscriber located outside the local service area of a station is distant to that station the same token, the station is distant to the subscriber.)	
Step 3: Divide your subscribers into subscriber groups according to the complement of stations to which they are distant. Ea subscriber group must consist entirely of subscribers who are distant to exactly the same complement of stations. Note that system will have only one subscriber group when the distant stations it carried have local service areas that coincide.	
Computing the base rate fee for each subscriber group: Block A contains separate sections, one for each of your system subscriber groups.	n's
In each section:	
<ul> <li>Identify the communities/areas represented by each subscriber group.</li> <li>Give the call sign for each of the stations in the subscriber group's complement—that is, each station that is distant to all o</li> </ul>	f the
subscribers in the group.	
• If:	porte 2, 2
